# Human and Planet sickness: What's the link?

Ecosystem (Nature)

# Feeling Safe

Psychological safety is recognised as central to mental health, wellbeing (Sullivan et al, 2018) and post-traumatic growth (Norman et al, 2020)

# Feeling Valued

Flett, G.L. and Heisel, M.J., 2021. Aging and feeling valued versus expendable during the COVID-19 pandemic and beyond: a review and commentary of why mattering is fundamental to the health and well-being. *International Journal of Mental Health and Addiction*, 19(6), pp.2443-2469.

# Sense of belonging

Trachtenberg, E., 2024. The beneficial effects of social support and prosocial behavior on immunity and health: A psychoneuroimmunology perspective. *Brain, Behavior, & Immunity-Health*, p.100758.

**There are three domains that affect our sense of feeling safe,  
value and belonging.**

## People

## Place

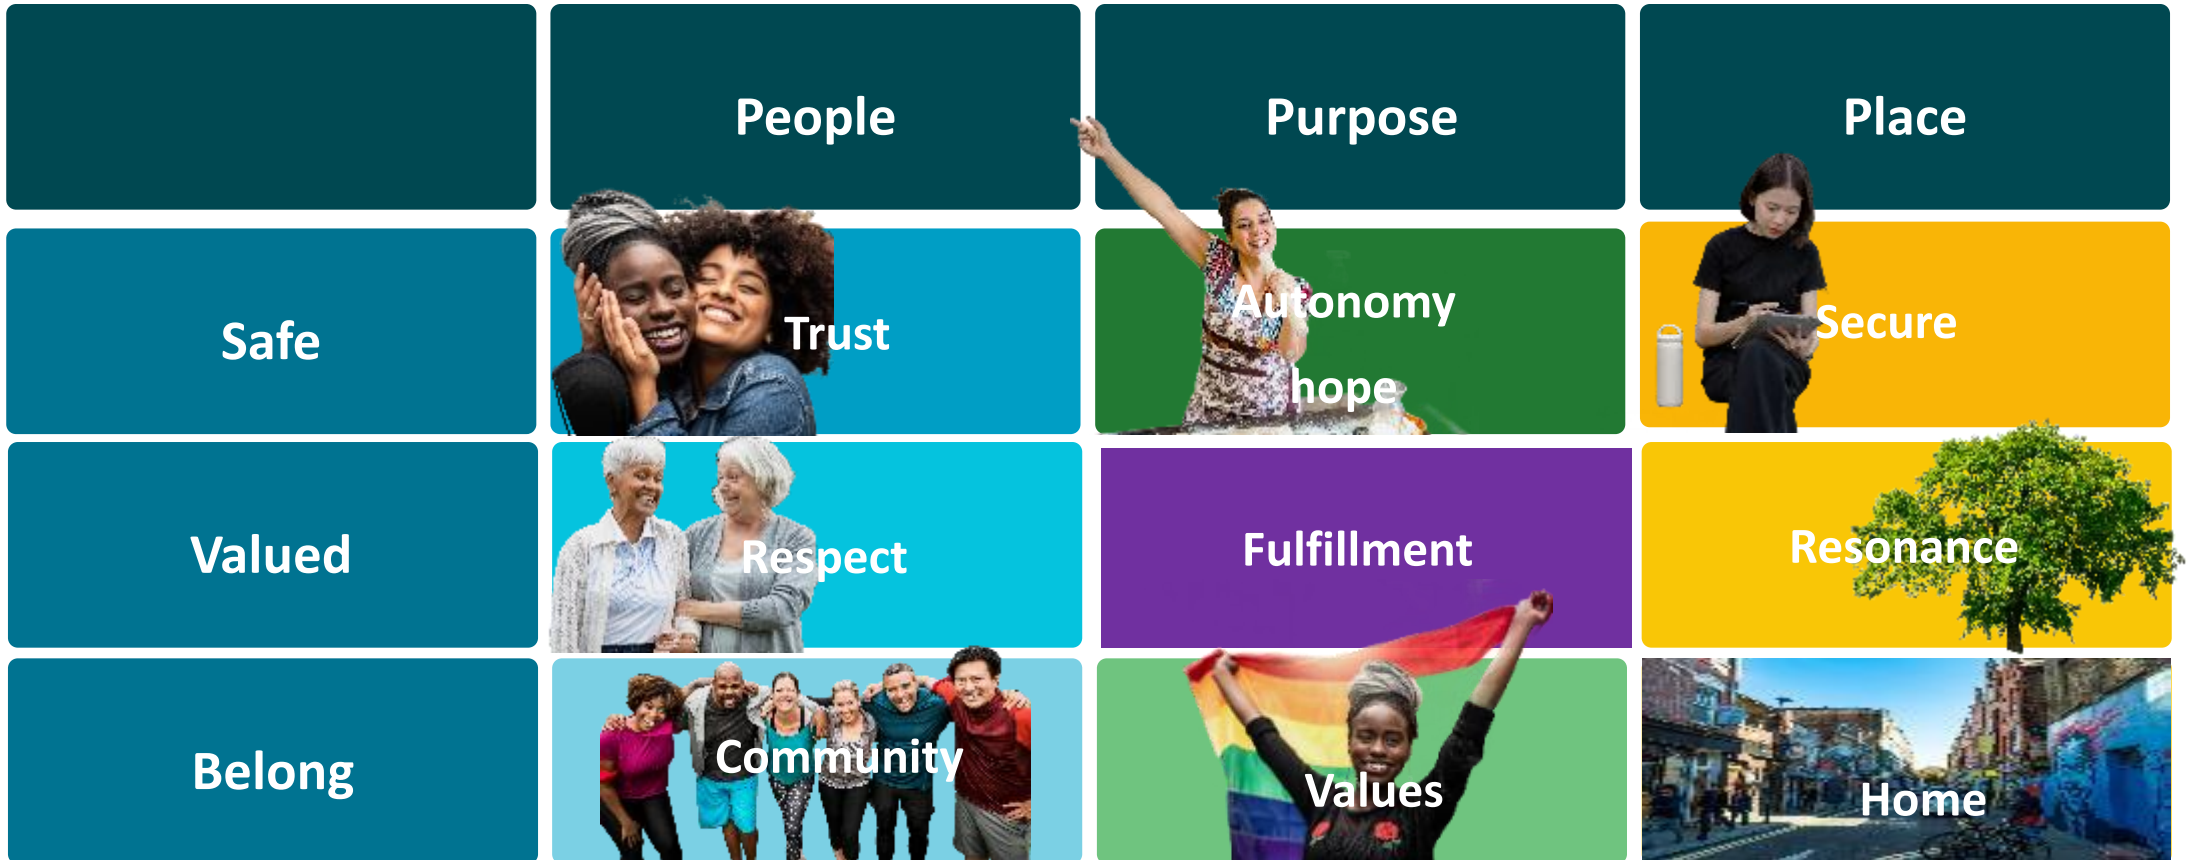

## Purpose

# The Health Creation Matrix<sup>©</sup>

Stressors

Acute Stress

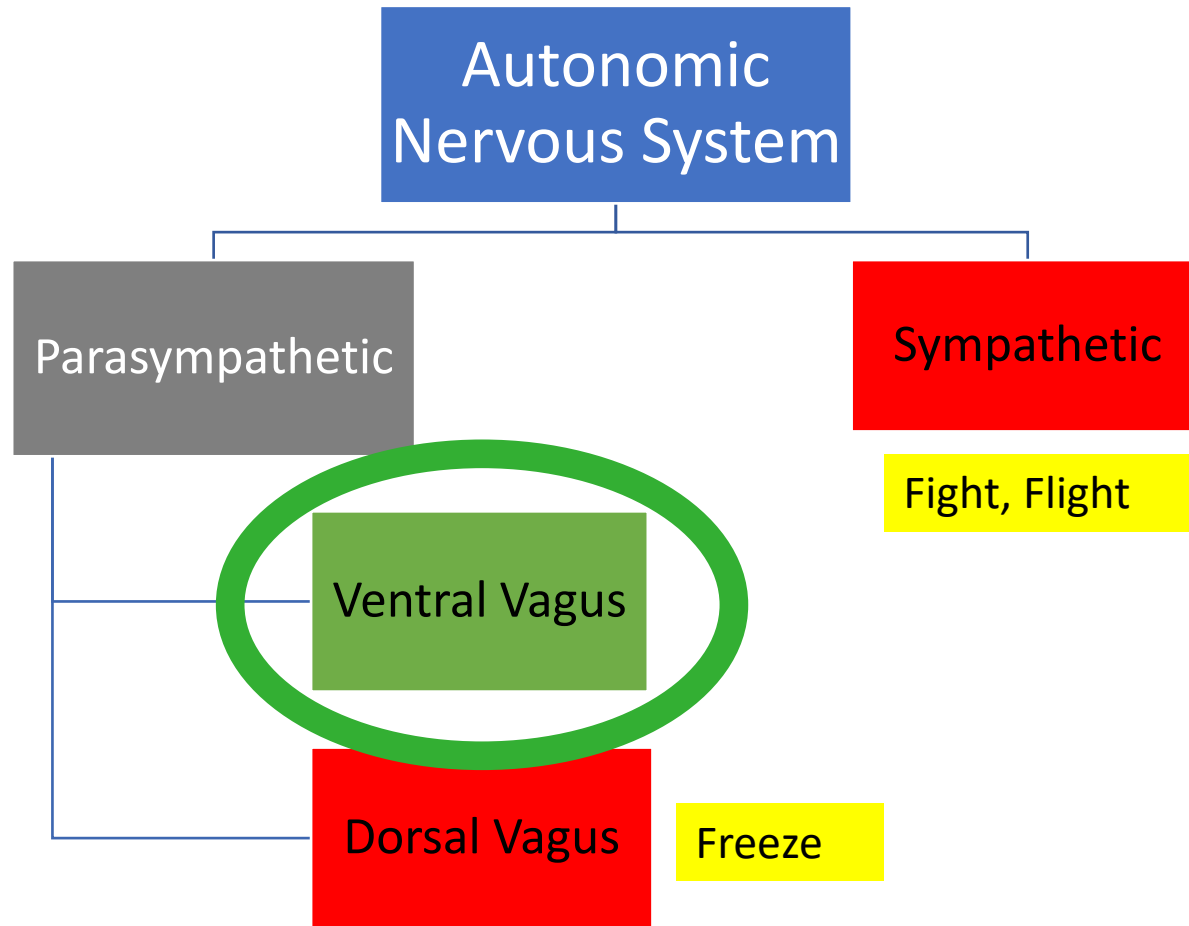

Hyperstasis  
(Better State)

We Thrive

The Resilience Matrix<sup>®</sup>

	People	Purpose	Place
Safe	Compassion Trust	Hope Autonomy	Secure Sanctuary
Valued	Listen Friendship	Self-Awareness Discovery	Wonder Beauty
Belong	Tribe Community	Values Give	Familiar Heritage

Weak Resilience

Chronic Stress

Stress Hormones

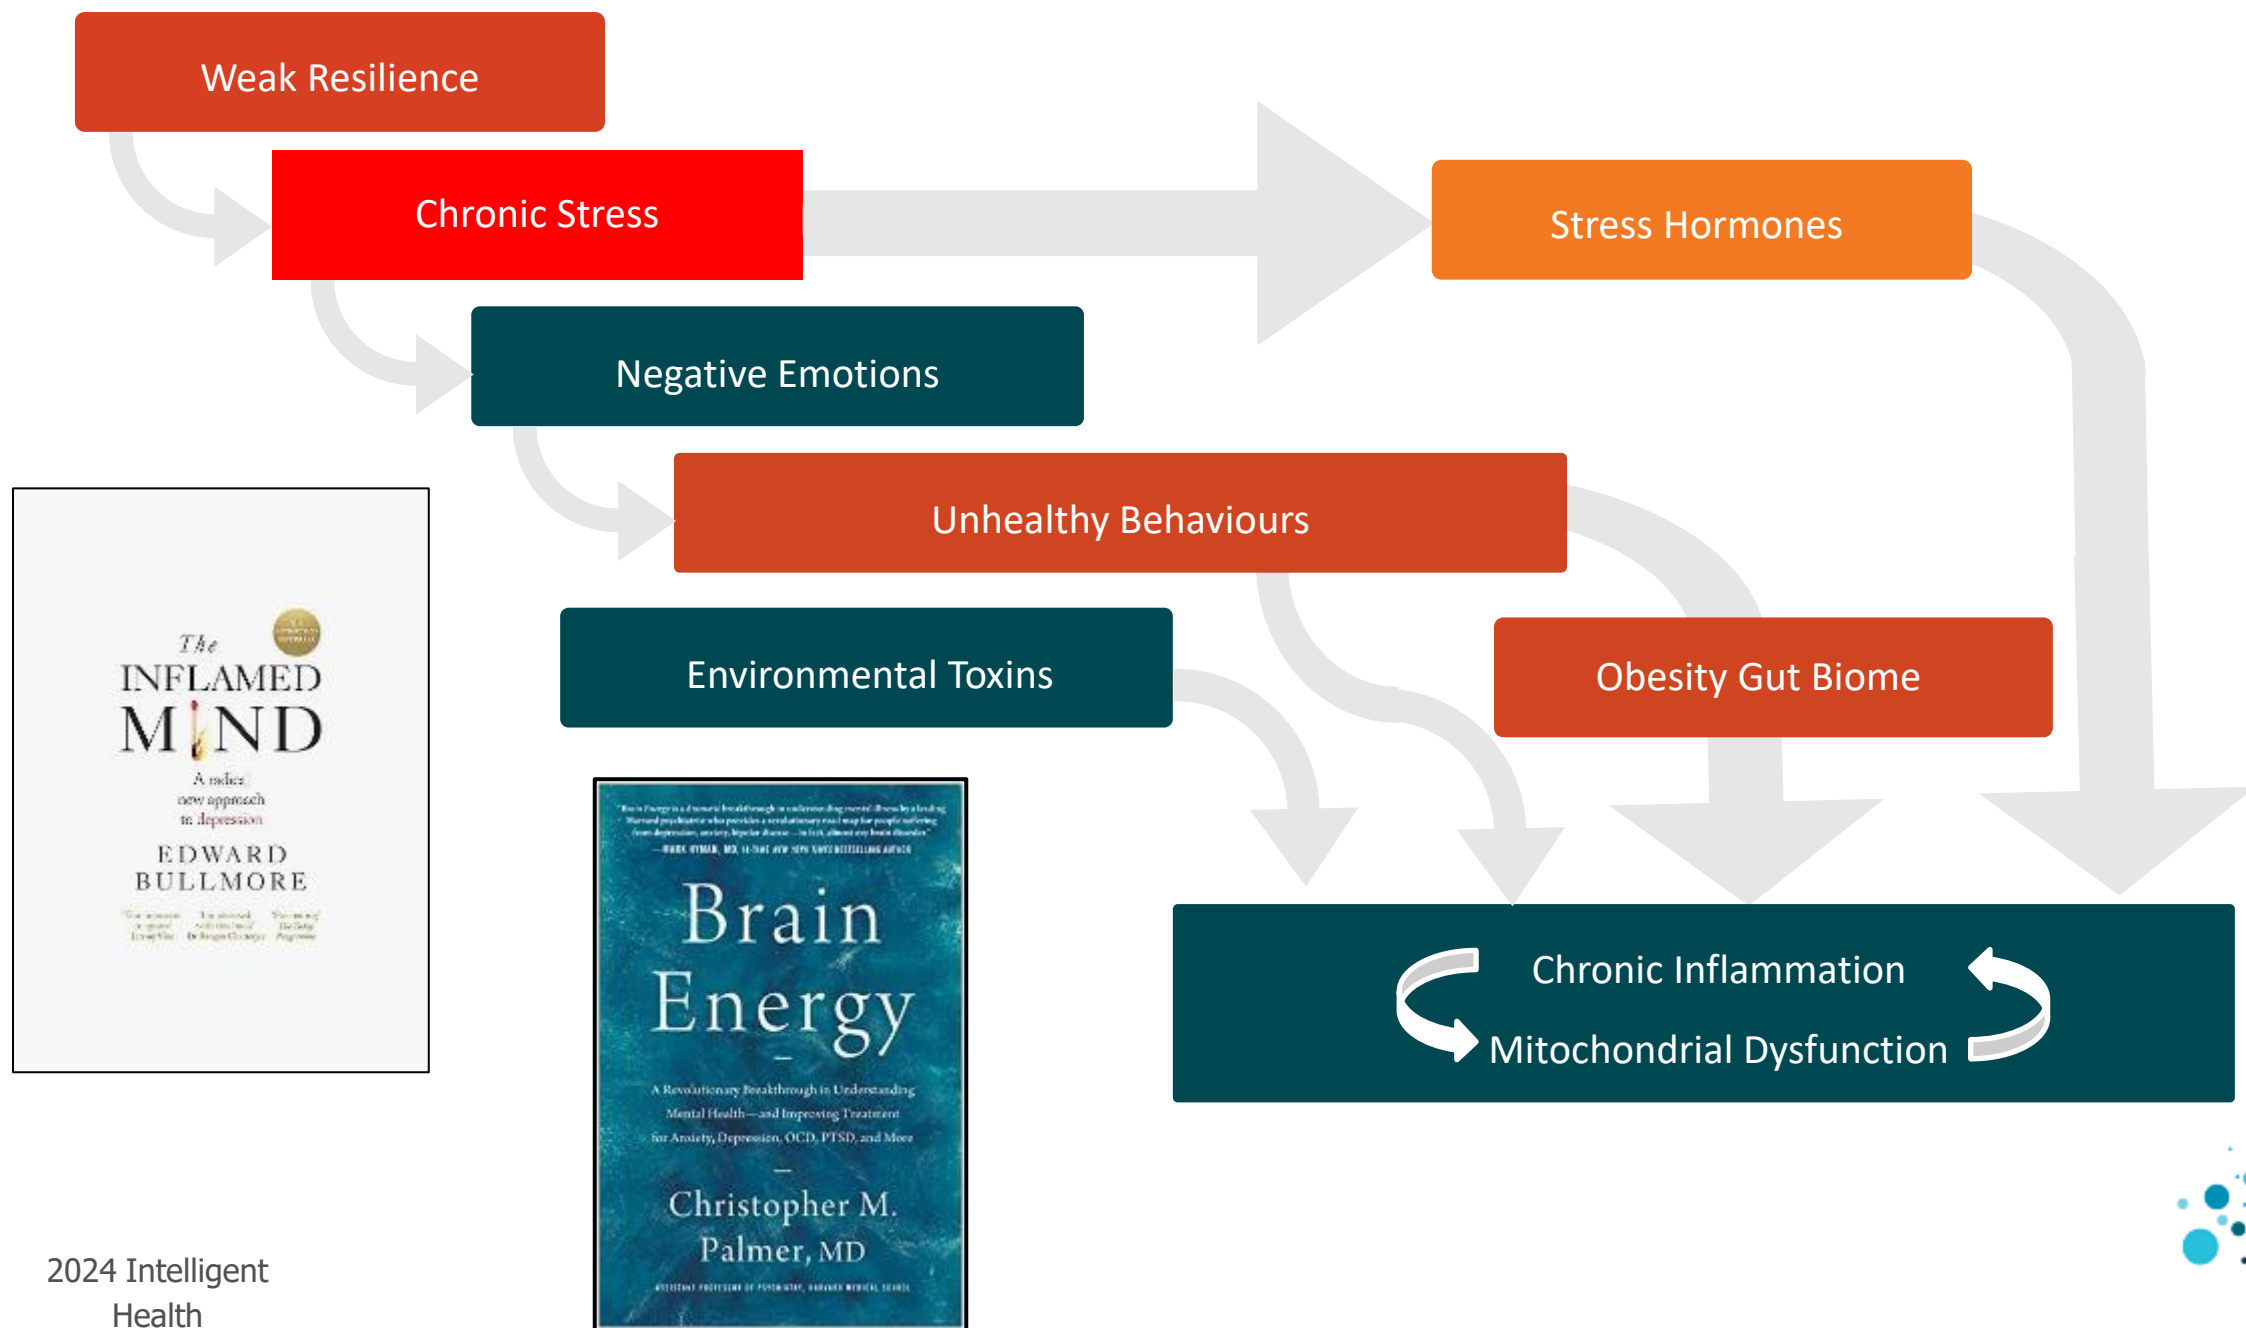

Negative Emotions

Unhealthy Behaviours

Poor Sleep  
Inactivity  
Poor diet  
Addictions

All these “unhealthy”  
lifestyles are protective  
when under stress

# Chronic Stress

Picard, M., Kempes, C., Pontzer, H., Behnke, A. and Shaulson, E.D., 2025. Energy Constraints on Human Health.

Stress

Growth  
Maintenance and  
Repair

Vital

Increased Chronic Stress uses up additional energy and takes it from Growth Maintenance and Repair. Cells become less efficient and demand more energy.  
Chronic Inflammation uses up further energy

Weak Resilience

Chronic Stress

Stress Hormones

Negative Emotions

Unhealthy Behaviours

Environmental toxins

Obesity Gut Biome

Disease

Diabetes, Dementia, Heart Disease  
Depression, Arthritis, Anxiety,  
Cancer, Stroke

Chronic Inflammation  
Mitochondrial Dysfunction

Furman, D., Campisi, J., Verdin, E.,  
Carrera-Bastos, P., Targ, S.,  
Franceschi, C., ... & Slavich, G. M.  
(2019). Chronic inflammation in the  
etiology of disease across the life  
span. *Nature medicine*, 25(12),  
1822-1832.

# HCI adult factors

The statements that respondents are asked to rate

	People	Purpose	Place
Safe	Most people are trustworthy	I feel in control of my life I've been feeling optimistic about my future	Overall, I think my neighbourhood is a good place to bring up children
Valued	The friendships and connections I have with other people mean a lot to me	I lead a fulfilling life	I enjoy exploring my neighbourhood
Belong	There is a group or community which I feel I belong to	I like sharing my time with others	I want to remain a resident of this neighbourhood for a number of years

Respondents are asked the extent to which they agree with each statement:  
Strongly Disagree, Disagree, Neither Agree nor Disagree, Agree, Strongly Agree

# Ipswich - Granular Evidence supporting targeted effort

Ipswich Players Home Location: Low Health Creation, Physically Inactive, and Low Nature Connection

Key

The insight can be used at street/neighbourhood level to understand the intersecting risk factors. Helping evidence need and build on strengths.

Spinner Close

Spencer Road

Higher density

Lower density

334 players

# HCI

## Diabetes

### Aged 50+

The friendships and connections I have with other people mean a lot to me

I want to remain a resident of this neighbourhood for a number of years

I like sharing my time with others

I lead a fulfilling life

Overall, I think my neighbourhood is a good place to bring up children

I enjoy exploring my neighbourhood

**HCI Index Score**

I feel in control of my life

I've been feeling optimistic about my future

There is a group or community which I feel I belong to

Most people are trustworthy

HCI

# Intersectionality

The group represents people who are all of these;

- Female
- Long-term limiting Health condition or Disability
- Living in the most deprived quintile.

#Walk21Tirana  
#Time4Walking

The friendships and connections I have with other people mean a lot to me

I want to remain a resident of this neighbourhood for a number of years

I like sharing my time with others

I lead a fulfilling life

Overall, I think my neighbourhood is a good place to bring up children

I enjoy exploring my neighbourhood

HCI Index Score

I feel in control of my life

I've been feeling optimistic about my future

There is a group or community which I feel I belong to

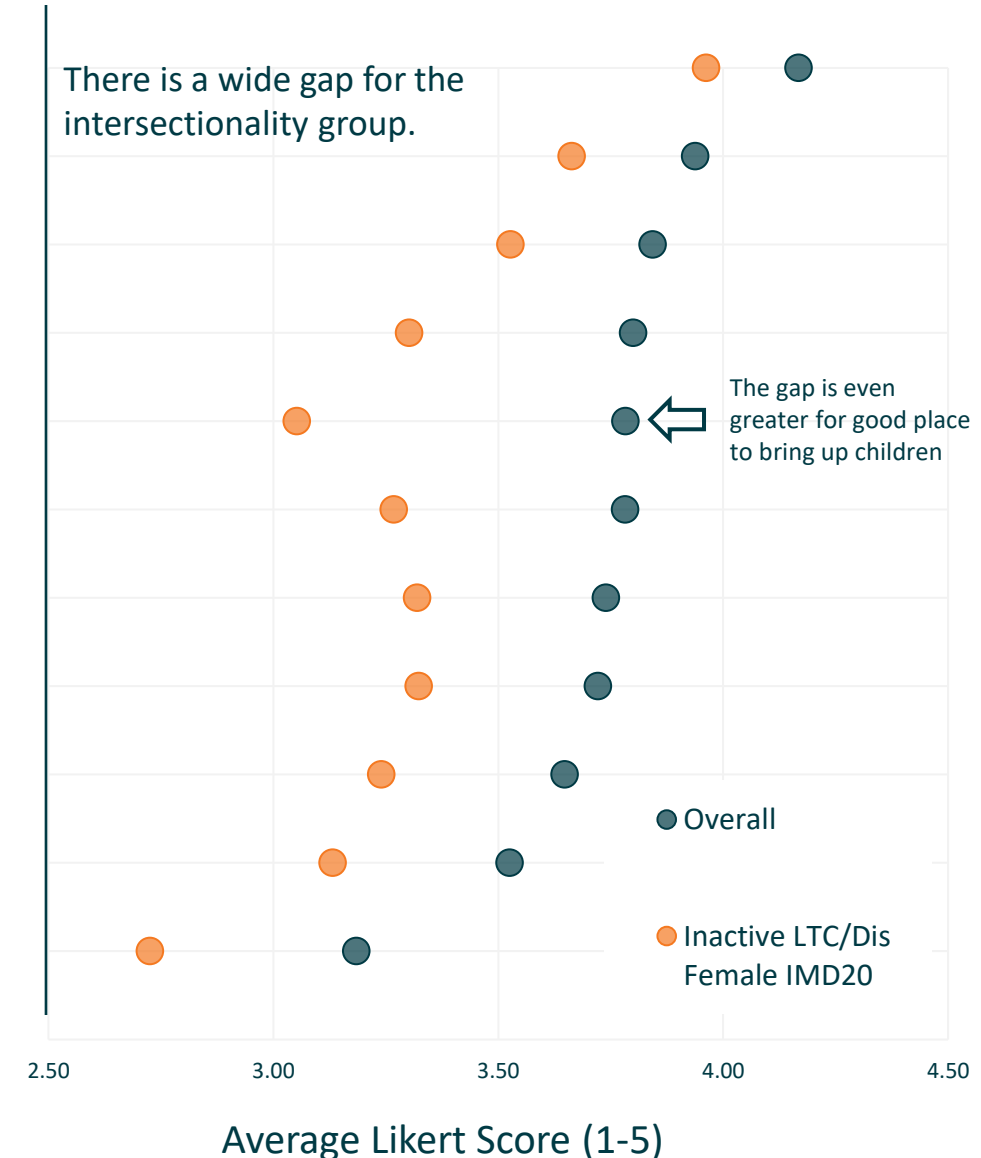

Most people are trustworthy

Responses (n):

Average 22,349

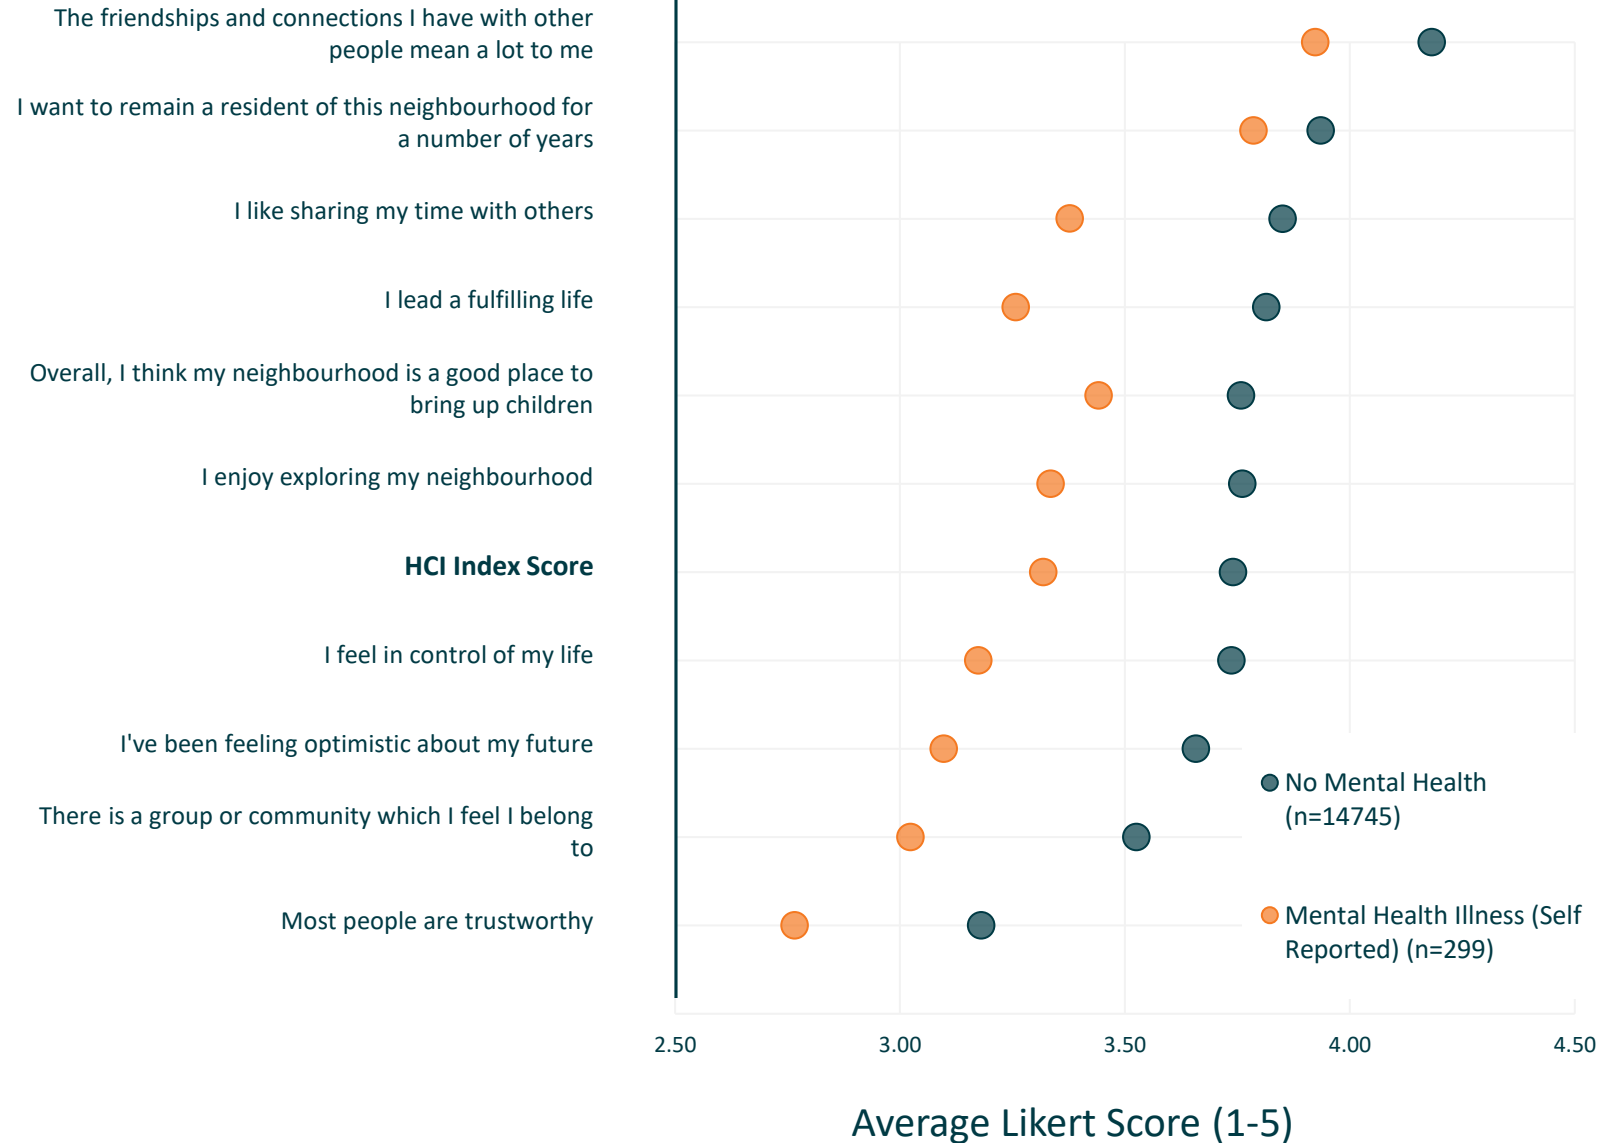

Intersection 288

There is a wide gap for the intersectionality group.

# HCI Mental Health

## Health Creation

Safe, Value, Belong

Poor Health Creation leads to Chronic Stress

## Lifestyle Prevention

Sleep, Physical Activity, Diet Smoking Alcohol

## Medical Prevention

Obesity, Hypertension, Gut Biome

Chronic Stress leads to Chronic Inflammation

## Treatment

Diabetes, Depression, Dementia, Heart disease, Inflammatory Bowel Disease, COPD, Anxiety.

Chronic Inflammation leads to these Diseases

As our Planet Heats  
our environment is  
becoming less safe

# 2024 was hottest since 125,000 years ago

## Global Temperature Trend from 0 to 2019 AD

Temperature Deviation (C) from 1961-1990 Average  
Year: 2019

## January 2025 hottest on record

Global average January temperature by year, compared with the pre-industrial average for January, 1850-1900

# Disconnect from Nature

# Association Between Trees, Vegetation, Depression and Stress

Normalized Difference Vegetation Index (NDVI)

Mitchell, R. and Popham, F. (2008) Effect of exposure to natural environment on health inequalities: an observational population study. The Lancet 372(9650):pp. 1655-1660.

# How a short walk in Nature can change your brain structure

**a**

**b**

Nature route – Grünwald forest

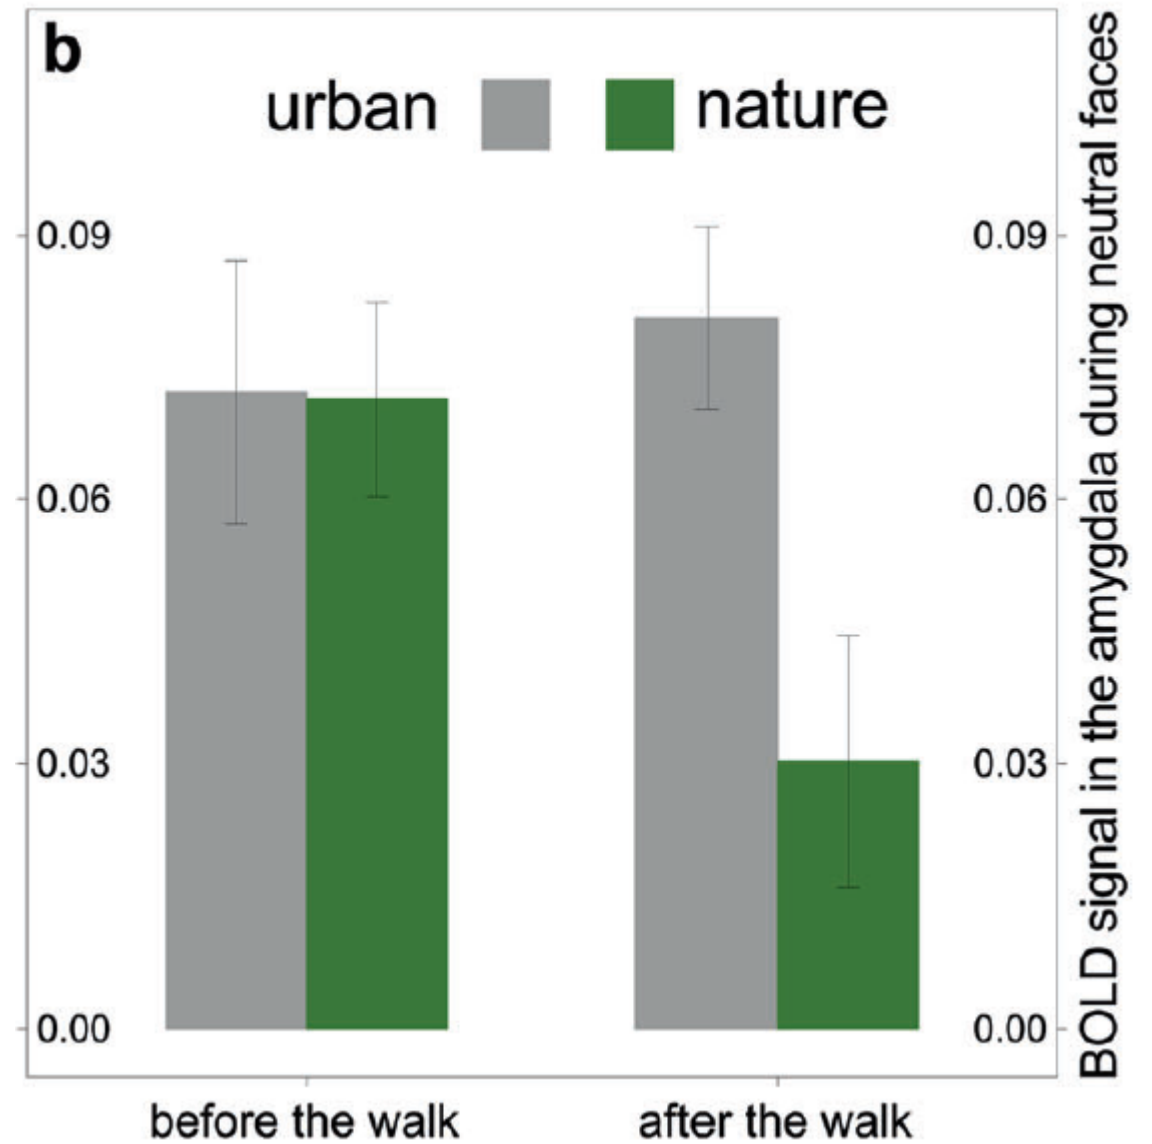

**c**

Urban route – Schloßstraße

## Amygdala changes after 60 min walk

# Hippocampus changes after 60 min walk

C

Mean change in sgPFC perfusion  
ml (blood) / 100g (tissue) / minute  
at [-1 31 -4]

Reduced blood flow in the prefrontal cortex reduces negative rumination

Bratman et al. 2015. Nature experience reduces rumination and subgenual prefrontal cortex activation. PNAS. 112(28):8567-8572

## Start Well

High  
Blood Pressure  
in pregnant  
women increased  
by 14% for every  
300 meters away  
from green  
space

Birth  
weight was  
healthier  
within the 500  
metres of  
green space

1. Grazuleviciene R et al Int J Environ Res Public Health 2014 11 2958-2972
2. Dadvand P Env Health Perspectives 120 10

A photograph of three children climbing a large, mossy tree trunk in a lush green forest. One child is on the left, another in the middle, and a third is partially visible on the right. The scene is filled with sunlight filtering through the leaves.

Grow Well

**Rural children have a larger Hippocampus compared to urban children**

Kühn, et al 2020. Brain structure and habitat: Do the brains of our children tell us where they have been brought up?. *NeuroImage*, 222, p.117225.

Children aged 5-7yrs: Longer time spent in public green spaces was associated with longer telomeres

Grow Well

Miri, M., de Prado-Bert, P., Alahabadi, A., Najafi, M.L., Rad, A., Moslem, A., Aval, H.E., Ehrampoush, M.H., Bustamante, M., Sakhvidi, M.J.Z. and Nawrot, T., 2020. Association of greenspace exposure with telomere length in preschool children. *Environmental Pollution*, p.115228.

# Mitochondrial dysfunction shortens the telomeres

Venturelli, M., Morgan, G.R., Donato, A.J., Reese, V., Bottura, R., Tarperi, C., Milanese, C., Schena, F., Reggiani, C., Naro, F. and Cawthon, R.M., 2014. Cellular aging of skeletal muscle: telomeric and free radical evidence that physical inactivity is responsible and not age. *Clinical science*, 127(6), pp.415-421.

A man with a beard, wearing a light blue long-sleeved shirt and dark blue jeans, is lifting a young boy into the air. The boy is wearing a green jacket and blue jeans. They are in a grassy field covered with fallen autumn leaves. The background is a dense layer of fallen leaves.

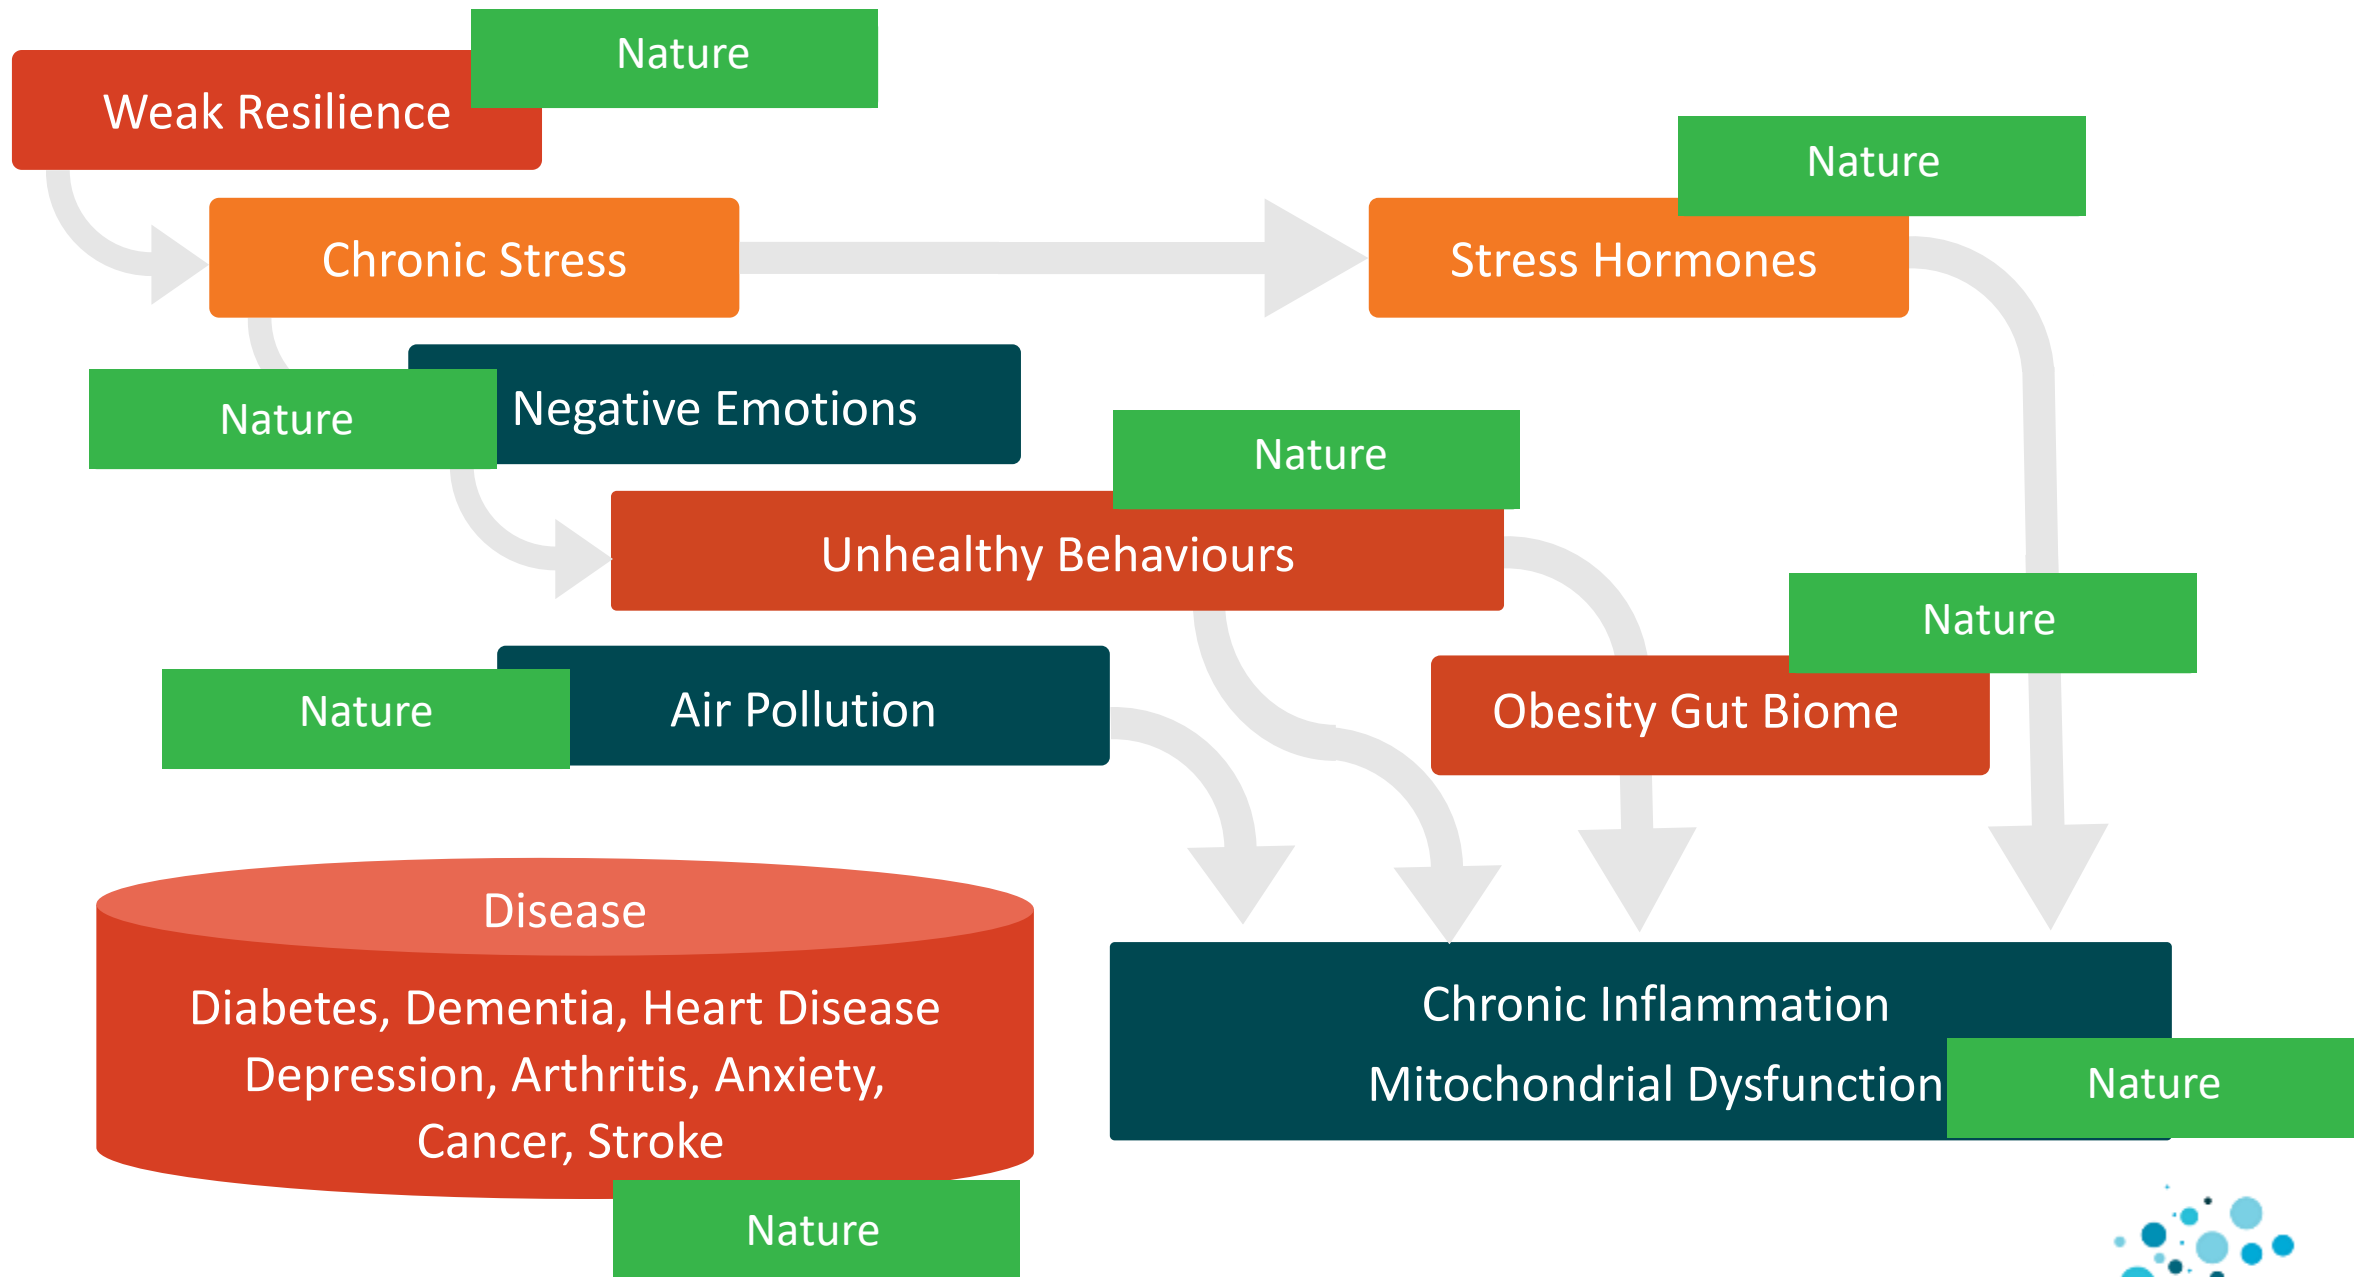

Stay Well

## Health Benefits of Nature

Meta-analysis from 143 validated empirical studies	Odds Ratio	P-Value
Type 2 Diabetes	0.72	P<0.001
All Cause Mortality	0.69	P<0.002
Cardiovascular Mortality	0.84	P<0.001

Twohig-Bennett, C. and Jones, A., 2018. The health benefits of the great outdoors: A systematic review and meta-analysis of greenspace exposure and health outcomes. *Environmental research*, 166, pp.628-637.

## Heat

- Hot weather is associated with increased deaths mainly from heart disease within 24 hours.
- Extreme heat is doubling every 10 years since 1979
- Every 0.1C of global temperature exposes a further 100 million people to extreme heat.
- By the end of the century no major city will safely be able to hold a summer Olympic Games due to extreme heat.

## Floods

- The Environment Agency update finds that 8 million (“one in four properties”) could be liable to flooding by mid-century when accounting for climate change.
- Globally, flood hazard could ~increase by up to 50 % if we don’t restrain emissions.
- Depression outcomes were elevated by 8-fold and PTSD by 14-fold among flooded compared with unaffected participants

# Sleep

A man with a beard is lying in bed at night, looking at a smartphone. He is wearing a light blue shirt. The room is dark, and the lighting is soft, coming from the phone's screen. The background is a plain white wall.

For every rise in night-time temperature of 10C there is 20% less sleep across a population.

# Food supply

An aerial photograph of a vast cornfield during harvest. Five yellow combine harvesters are visible, moving in a diagonal line from the top right towards the bottom left, leaving long, straight tracks of harvested grain behind them. The field is a deep golden-brown color. In the bottom right corner, there is a small blue building, a yellow tractor, and a white car parked on a dirt road.

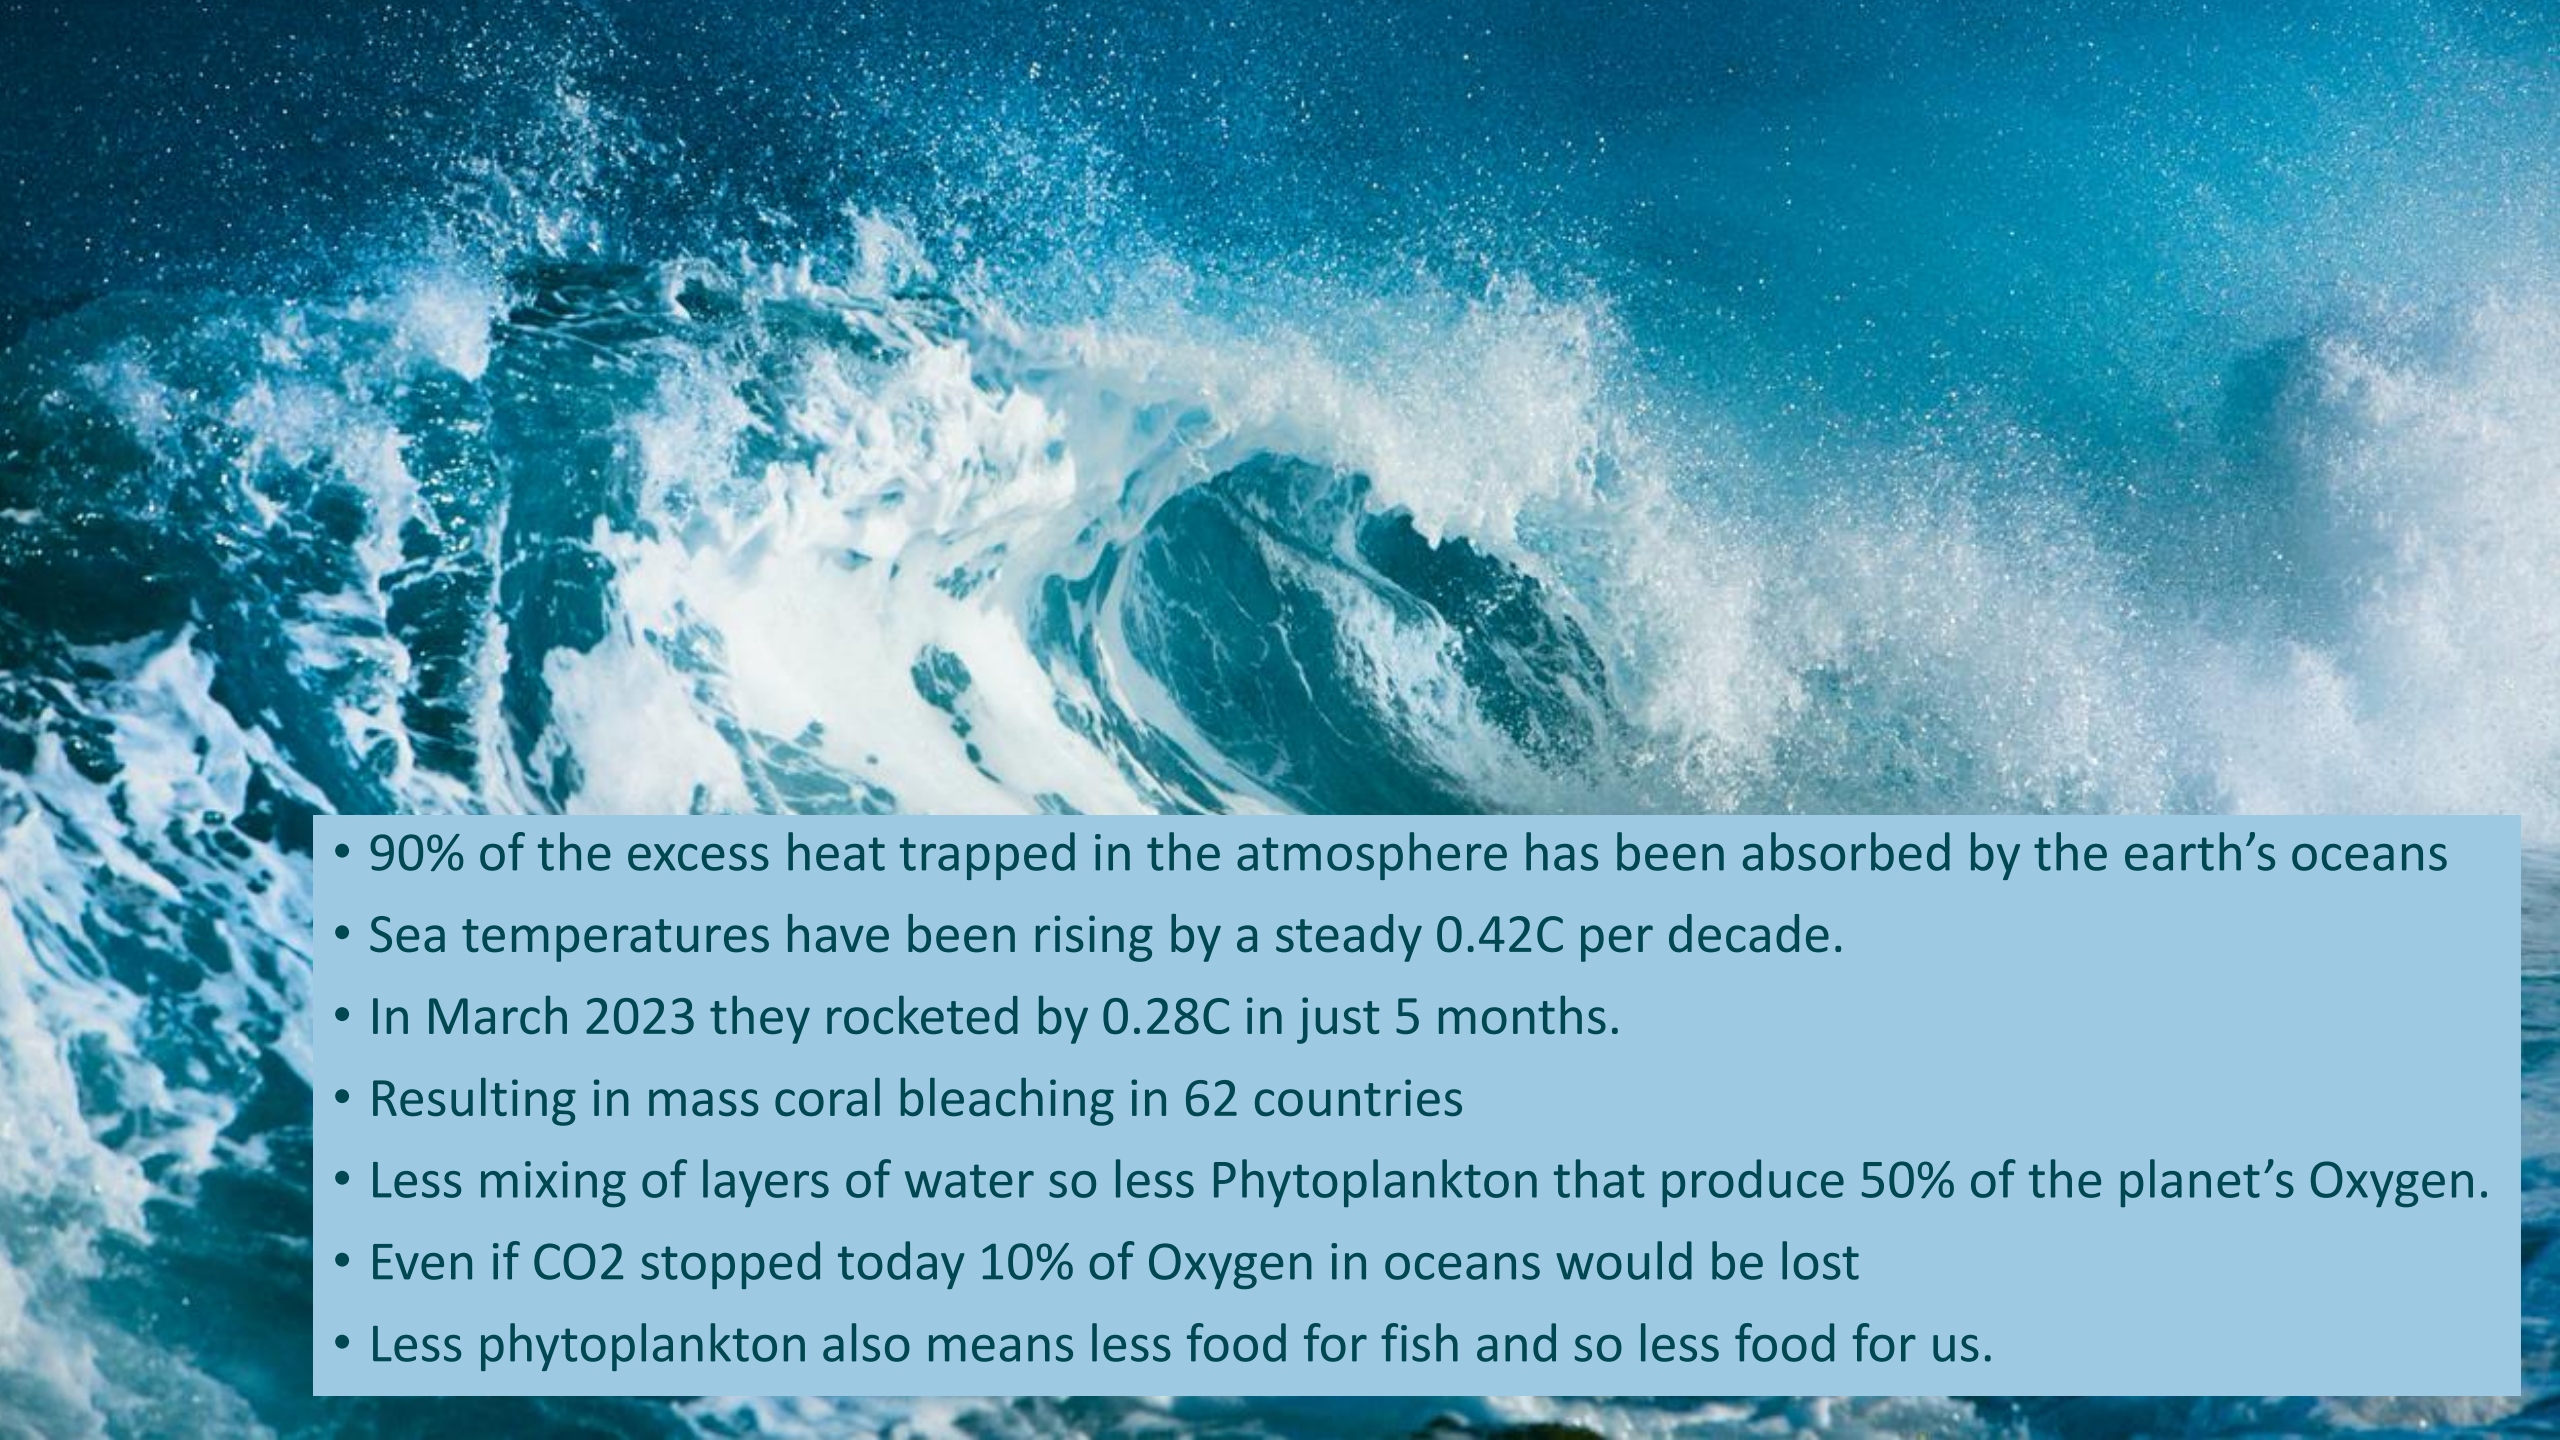

- Food crisis is already here.
- More heat requires more intense farming
- This requires more water and more energy
- Food inflation has already started
- 700 million people face hunger 9% of the population
- That's 150 million people more than in 2019

# Food supply

- Brazil produces 10% of global food and 50% of all Soya Bean and 30% of all Beef.
- 18% of the Amazon is already deforested if this reaches 20-25% and the global temperature exceeds 2C then we could reach a tipping point and the hotter drier climate may make food production impossible.

- 
- 90% of the excess heat trapped in the atmosphere has been absorbed by the earth's oceans
  - Sea temperatures have been rising by a steady 0.42C per decade.
  - In March 2023 they rocketed by 0.28C in just 5 months.
  - Resulting in mass coral bleaching in 62 countries
  - Less mixing of layers of water so less Phytoplankton that produce 50% of the planet's Oxygen.
  - Even if CO2 stopped today 10% of Oxygen in oceans would be lost
  - Less phytoplankton also means less food for fish and so less food for us.

# HEALTH CO-BENEFITS OF ACTION ON CLIMATE CHANGE

## Tackles health Inequality

### ↑ Energy Efficiency of Homes

#### Cheaper to heat

Improves physical and mental health

### ↑ Locally Sourced Plant Based Diets

Improves food security, nutritional status and tackles obesity

Improves physical and mental health

### ↑ Walking and Cycling

Reduce air pollution, increases population fitness, reduces obesity  
Improves physical and mental health

### Community Action

Helps build social connections – tackles isolation  
Increases community resilience  
Alleviates eco-distress  
Improves Mental Health

## Weight

In the UK  
**64%**

of adults are classed as being overweight or obese

### ↑ Access to Green and Blue Spaces

Trees cool cities and reduce air pollution

Time in natural spaces reduces stress and health inequalities

Improves physical and mental health

Take sufficient Physical Activity

# Over 2,500 trees were earned through playing Beat the Street in Burnley (2000 points = 1 tree)

Schools and community groups were invited back to help plant them across the borough.

The combination of tree planting and active community engagement helps foster a sense of pride of Place

(52) Beat the Street helped facilitate the creation of the Outdoor Town (Burnley) Using points as a currency 2,500 trees were purchased and planted by the families in Burnley

# Building Active Communities
